
Kaspersky End Point Security for Business Advanced

The Solution/offer shall:

- Include (3) Years licenses for (250) PCs/Servers/mobile devices.
- Give the administrators full capabilities of managing the solution through a unified central management console and to be able to generate robustness reports about the threats, update definition, etc on the remote devices.
- Enable the administrators to install/manage the software and the fixes/patches on the remote devices smoothly and through an agent.
- Support installing the software on devices joined to a domain and/or on independent devices (not joined to a domain), while at the same time being able to update to the most current updates, through the centralized server or directly via kaspersky servers.
- Be applicable to be installed on different versions of Windows such as Windows 7, Windows 8, Windows 8.1, Windows 10 (32,64) bit, Windows 2008 R2 , Windows 2012 R2 and newer windows server versions
- Include Security Center, Unified Management Console, Anti-malware for workstations and file servers, security for mobile & mobile device management controls (Application, device control) features.
- Include installation, configuration, operating, delivering, and commissioning
- Include training for (3) technical persons onsite (within TRC premises)
- Include 24*7 support, and unlimited same-day support visits
- guarantee a light weight agent that will not affect the performance of the devices.
- The original CD installation program should be delivered to TRC
